EXPERIENCE

Om Enterprise | Graphic Designer Intern | Jan – June 2024 | UI/UX, Web Designing and Development, Logo Designing([Arun](#))

- With expertise in web development, graphic design, and video editing, I bring innovative solutions to OM Enterprises, enhancing brand presence and driving business success..
- My skills in web development, graphic design, and video editing drive creative solutions at OM Enterprises, enhancing client brand presence.
- I developed the ARUN ICECREAMS website, showcasing their full product lineup with a visually captivating and user-friendly design to enhance brand presence. My work involved creating engaging content and intuitive navigation to drive customer engagement and sales.

KEY PROJECTS

Crop Prediction System | Predict best crop type as per climatic conditions

- Developed a Crop Prediction application using Python Flask, designed to help users determine the optimal crop to grow based on environmental factors, easy entry of climate data for predictive analysis.
- Implemented a robust backend database to store and process user input such as temperature, pressure, and other relevant data for accurate crop recommendations.

Attire | Built an e-commerce site displaying a full product catalog.([Attire](#))

- Designed and developed an e-commerce website using HTML, CSS, and JavaScript, featuring a clean, user-friendly interface with multiple sections for seamless navigation.
- Implemented a product listing system that allows users to view and access detailed product pages, enhancing the overall shopping experience.

WordPress Website | Built a responsive WordPress site with key information and navigation.

- Developed a responsive WordPress website on agriculture, utilizing the Elementor plugin for dynamic and engaging content presentation.
- Integrated intuitive navigation and visually appealing layouts to effectively communicate key agricultural insights.

Hatsun Carrers | Built a responsive Python-Flask site with key information and navigation.([Hatsun](#))

- Created a website on Replit using Python and Flask, linked the project to GitHub, and deployed it on Render.
- The website features a single page that displays information about the company and the available job roles.

Event Management System| This project is an event management web application([Event Management](#))

- built using Python Flask, featuring a login system, a centered event creation form with a responsive, visually appealing design, and is ready for deployment on Render.
